

## Outdoor Valentine's Day activities

### Heart finding nature walk.

Pack your camera and take a walk to your local woodland or park to see how many heart shaped nature objects you can find. Take photographs of them and send your findings into school.

### Sand prints.

Use the sand as your drawing board and draw love hearts in the sand. You might want to write a message to your loved ones. Be quick before the sea washes it away.

### Make a heart with nature.

Choose winter berries, leaves, pinecones or stones to make a love heart on the grass. Leave it there to make passer-by's smile.
