How to build your own den

A quick and easy way to make a cosy den at home or in your garden.

What you need: bedsheets, pegs and string

What to do:

1. Tie a piece of string tightly between two points in your room or outside.

2. Throw a sheet over the string and peg it, so it's touching the floor on one side.

3. Position two chairs in front.

4. Lift the front corners of the sheet and peg it over the chairs.

5. Make it comfortable with blankets, cushions and books to curl up with.
